

FAST FORWARD

to the Future of Prescribing with the
Named SCRIPT, F&B and RTPB Standards

Programming Spans Two Half Days: October 16 & 17, 2024

Get a Closer Look at Some of the Deep Dive Topics at NCPDP's 2024 Educational Summit & Register Today!

- **Formulary & Benefit (F&B) Standard: Next Generation of Drug Savings and Clinical Support** – Learn e-prescribing's drug selection process, how F&B compliments the Real-Time Prescription Benefit (RTPB) Standard and explore transformational enhancements in F&B v60 to maximize drug savings at the point of prescribing while improving efficiency and time to therapy.
- **Unlocking the Potential: The Infinite Possibilities of NCPDP Extensibility** – Learn when it's appropriate to leverage Extensions and discover strategic ways to use Extensions to help your organization deliver features to market faster and drive innovation.
- **Is It Covered? Requesting Patient Benefit Information** – Learn about the structure of the request, required segments and elements and the benefits of using the RTPB request transaction.
- **RTPB Response Transaction Deep Dive** – Learn extensive details related to the RTPB response transaction.
- **SCRIPT Change: What's New in v2023011** – Learn new and renamed transactions in NCPDP's newest version of SCRIPT, plus changes across all transactions, updates made to the message header and much more.
- **In the know: Understanding Medication Element Changes** – Learn all the technical changes made and new features added between NCPDP SCRIPT Version 2017071 and 2023011 for medication related elements.
- **Preparing for NCPDP SCRIPT Changes to CancelRx, RxChange, and RxRenewal Transactions** – Learn key changes specific to these three transaction sets, including addition of allergy

information and specific CancelRx reason codes, retraction and expiration for RxChange and RxRenewal request messages, and a new response type for RxChange and RxRenewal responses. Plus explore use cases to assist with planning and implementation.

- **Updates to Prior Authorization Messages** – Learn updates to ePA messages, including the newPANotification message, NoneChoiceID to PA Select, and NextQuestionCondition added to question types of Select and Date.
- **Filling the Gaps with RxFill** – Learn the enhancements to RxFill that enable new use cases with this one-way transaction. Get your ‘Fill’ of these new use cases and learn more about the new and renamed fields in the RxFill message.
- **Interoperability Advancements: for Long Term and Post Acute Care** – Learn changes related to multi-party communication enabling copies or notifications of prescription-related events; support of pharmacy managed workflow through RxFill event notification; provision for dispensed medication barcode; and support for communicating the completion date of medication reviews and reviewing providers.
- **And much more!**
